

### Another way to process Bacs payments

Have you ever wondered if processing Bacs payments through your bank is the most cost effective and process efficient option. Here we explore another way, outlining some of the benefits of direct Bacs payments via our payment gateway partner.

### If you ever needed to transfer money quickly

You will know that traditionally, bank charges for urgent transfers have been significant but with same day payments available through our payment solutions partner, the costs are minimal: **payments can be made almost instantaneously with Faster Payments.**

### If you have ever missed a payment due to restrictive processing times

If some Bacs runs have become almost impossible to achieve due to early processing cut-off times, you might be reassured to know with our payment solutions partner you never need miss a payment again: you can **submit payments from 7.00am until 10.30pm.**

### If you process international payments and wish they were as easy as domestic ones?

In a growing global economy, organisations looking to trade internationally need a simple, fast and reliable funds transfer solution to support their business. Our payment solutions partner has the answer: to link directly to the **secure international payments platform, GlobalPay.**

### If you would like more control and flexibility over your payments

Perhaps your business has a number of different divisions or operating businesses all using different

banks to process payments. Working with our payments partner, would give you the **freedom to change bank, consolidate your banking** or work differently without affecting your business critical payments processes.

### When you don't want to duplicate effort

For some organisations processing payments becomes a time consuming business as critical information has to be re-entered from accounting systems for the payments to be made. This not only wastes staff time, it increases the risk of transcription errors. We believe it is better to take a file from your host system or accounts package and import it directly to our payments software, **removing the need to re-key information.**

### When you have concerns about the security of your payments

Our payments solutions partner ensures security from both external interference and internal misuse. Externally, when connecting to the clearing mechanism, SSL connectivity coupled with the PKI infrastructure makes their solution unassailable during transmission. Internally, the integrity of the data is assured through sophisticated user security, Windows authentication, dual admin and user permission workflows.

### Would you like a free payments review?

Outlined here are just a selection of the benefits you could gain by processing your Bacs payments directly though a licensed software solution or with our approved partner bureau, but what are the real tangible return on investment and benefits for your business?

Why not ask about one of our free no obligation payments health checks? This review will look in detail at the payments you process, volumes of payments made, methods used and for what reason. Recommendations can then be made on how to achieve real return on investment from migrating to a payments gateway solution.
